

PROFESSIONAL TIRE INFLATION GUN

Thank you for choosing this fine product from GRIOT'S GARAGE. The **PROFESSIONAL TIRE INFLATION GUN** uses a large easy to read pressure gauge with measurements in PSI and BAR. A locking air chuck provides easy one handed operation. A bleeder valve allows the user to release air from the tire to adjust the pressure as needed. Enjoy the best!

USEFUL INSTRUCTIONS

To start connect the regulated air supply hose to the inlet fitting located at the base of the handle. Maximum supply pressure should not exceed 120 psi. To inflate and check your tire pressure, place the air chuck firmly onto the valve stem of the tire. Press down on the thumb lever to lock the air chuck into place. Read the air pressure on the dial of the pressure gauge and adjust as needed. To inflate the tire pull the trigger lever located on the front of the handle until air is emitted. Release the lever and read the pressure. Repeat this operation until the desired pressure is displayed on the dial of the pressure gauge. If the tire is over inflated, press the bleeder valve button located on the side of the handle. This will deflate the tire to lower the air pressure. Release the button and read the pressure. Repeat this operation until the desired pressure is shown on the dial of the pressure gauge. Once the desired tire pressure is set unlock air chuck by lifting up on the thumb lever and remove the air chuck from the valve stem.

WARNINGS AND CAUTIONS!

The pressure gauge should not receive knocks or blows; if it does the accuracy of the gauge could be affected. Keep the **PROFESSIONAL TIRE INFLATION GUN** in the storage container when not in use. Always store the **PROFESSIONAL TIRE INFLATION GUN** in a safe place, out of the reach of children. Avoid connecting the supply hose with a pressure above 120 psi. Avoid connecting the end piece (2) to sources which have a pressure higher than the pressure indicated on the dial of the pressure gauge. This gun should only be used with regulated air. Do not use the **PROFESSIONAL TIRE INFLATION GUN** in ways other than those described in operation instructions.

DISCLAIMER
