

HEADLIGHT/FOG LIGHT PROTECTIVE SHIELD

Thank you for choosing this fine product from GRIOT'S GARAGE.

IMPORTANT PREPARATION INSTRUCTIONS

Thoroughly clean the lens you wish to protect. Ensure that all dirt, grease, oil and bug jerky is removed. Dry the lamp with a lint-free cloth and make sure your hands are clean. Remove the PROTECTIVE SHIELD from the package. Leave the paper backing in place. Hold one sheet of the PROTECTIVE SHIELD to your lamp and measure a template approximately one half inch (2cm) larger than all the edges of the lamp. Leaving the paper backing in place, cut out the oversized pattern with sharp scissors or knife. Warm the PROTECTIVE SHIELD with the vehicle heater on high, or use a hair dryer or heat gun. This will allow for easier installation. Be careful not to overheat the PROTECTIVE SHIELD as you may damage it.

PERFECT APPLICATION

Peel off the paper backing from one side of the PROTECTIVE SHIELD (approximately 1 - 1 $\frac{1}{2}$ "). Press the PROTECTIVE SHIELD to the lens starting at one edge. With moderate pressure, sweep the surface of the PROTECTIVE SHIELD across the lens surface. The PROTECTIVE SHIELD will adhere to lens. Work slowly as you pull back another 1 to 1 $\frac{1}{2}$ " of paper until the lens has been fully covered. NOTE: Press the PROTECTIVE SHIELD around the alignment tabs on the lens (small peaks of glass). If you wish, use a hole punch or a knife and trim a circular hole from the PROTECTIVE SHIELD as closely as possible around the tabs. This will allow the PROTECTIVE SHIELD to lie flat on the glass surface. Press any remaining large air bubbles out to the edges of the lens. Smaller air bubbles will disappear over time. Trim your PROTECTIVE SHIELD by following the outer edge of your lens with a sharp knife. Keep the knife edge at a right angle to the glass surface for the cleanest edge. Do not wash the vehicle for 48 hours following application to allow the adhesive to set.

DISCLAIMER

These shields will not protect your headlights from all impacts. Extreme impacts or cold water on hot lights (shock) may break lights. GRIOT'S GARAGE is not responsible for any damage to lights while the HEADLIGHT/FOG LIGHT PROTECTIVE SHIELD is in use.

ANSWERS TO YOUR QUESTIONS

Should you want to order another HEADLIGHT/FOG LIGHT PROTECTIVE SHIELD, or for a complete selection of quality GRIOT'S GARAGE products, please write, use the internet or call us toll-free.
