

LASER PARKING SYSTEM

Thank you for choosing this fine product from GRIOT'S GARAGE. The LASER PARKING SYSTEM is easy to install and convenient to use. Enjoy the best.

USEFUL INSTRUCTIONS

The LASER PARKING SYSTEM is activated by sensing the motion of the garage door opener. The sensor sends power to the laser beam pointer that can be aligned to a convenient visible location on your car (dashboard, wiper blade etc.). Once the beam is aligned with a pre-determined position on your vehicle, it is safe to stop. Please allow 4-6 inches variation due to minor differences of the car's position as you pull into the garage. The laser pointer will remain activated for one minute. To reactivate the laser, simply open or close the garage door.

Included in the sensor is a second wiring inlet that allows two lasers to operate at one time. A second laser beam pointer can be purchased separately. This works well with double-wide garage doors that allow two-car parking. A lithium 9-volt battery (not included) should be used for longer life. An optional 110-volt power transformer is available for battery-free operation.

ASSEMBLY INSTRUCTIONS

Items included in the package are:

- 1- Sensor
- 1- Laser beam pointer (attached to the sensor)
- 1- Additional cord

Attach the sensor directly to the garage door opener with the double-backed tape supplied in the container. The laser beam pointer may be removed from the sensor for alternate mounting locations. You may also use the additional cord to connect the laser beam pointer to the sensor. Additional laser beam pointers may be purchased separately. These work great with double-wide garage doors or long bays that allow two-car parking. To activate the laser pointer, open or close the garage door. The laser will remain active for one minute. Align the laser with a pre-determined position on your vehicle while it is safely parked in the garage. To reactivate the laser, open or close the garage door. Once aligned, the LASER PARKING SYSTEM is ready to use.

CAUTION

Never point the laser beam towards the face. Laser light can damage eyesight.

DISCLAIMER

GRIOT'S GARAGE is not responsible for any misuse of the LASER PARKING SYSTEM, for any injury or damage incurred to any person or object related to the LASER PARKING SYSTEM.

ANSWERS TO YOUR QUESTIONS

Should you want to order another LASER PARKING SYSTEM, or for a complete selection of quality GRIOT'S GARAGE products, please write or call us toll-free at 800-345-5789. You can visit us on the Internet at www.griotsgarage.com. Reorder item number 36801. For a second laser, you may order item number 36817. For a 110-volt power transformer, you may order item number 36818.

Have fun in your garage!™
