

AUTOBAHN MIRROR

Thank you for choosing this fine product from GRIOT'S GARAGE. Your AUTOBAHN MIRROR is designed to be mounted on the inside of your car. It will increase your visual range five fold, eliminating the blind spot and letting you quickly and clearly oversee the traffic situation without turning your head.

INSTALLATION

1. Snap the support arm into the socket on the mirror. You can use one or both of the support arms as desired.
2. Find and mark the spot on either the inside of the windshield or the dashboard where you want to mount the mirror (if you're mounting it on the inside windshield, choose a spot approximately two inches from the frame).
3. Clean and dry the area where the mirror is to be mounted. Vinyl dashboards must be dry and clean of any protectants or dressings. In cold weather, make sure to heat the car beforehand as adhesive will not adhere securely on a cold or damp surface.
4. Peel off the protective foil from the mounting bracket and press it firmly onto the marked spot.
5. Adjust the mirror so that when you see the rear of a car in your outside mirror you are able to see its front in the AUTOBAHN MIRROR.
6. Optional: Once the mirror is in the desired position, you may use a drop of glue on the joints to insure it does not move.

DISCLAIMER

GRIOT'S GARAGE is not responsible for any damages while the AUTOBAHN MIRROR is in use. Please drive carefully.

ANSWERS TO YOUR QUESTIONS

Should you want to order another AUTOBAHN MIRROR, or for a complete selection of quality GRIOT'S GARAGE products please write, use the internet or call us toll-free. Reorder item number 82020.
